

Keynote: Thomas Siems

October 11, 2017

1. Would you say that the space sector is on the radar of the economists at the Fed (or beyond)?
2. What is your vision for space-finance synergies to attract more capital to the commercial space industry?
3. Will the presentation be made available in hard and or soft copy?
4. Space experts have said we can colonize Moon for \$10B. Any ideas on raising first \$1B to get started? Know any billionaires?
5. What impacts would lower than 2% inflation have on the economy, and especially on the commercial space industry sector?
